### **DETAILED ACTION**

1. The previous restriction requirement is hereby withdrawn. A new election of species is set forth below. The delay in action to the applicant is regretted.

#### ***Restriction Requirement***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-34, 65-100 and 132-145 drawn to A Diffraction Grating which is insensitive to polarization for at least a range of 30nm, classified in class 359, subclass 569.
  - II. Claim 35-64, 101-131, drawn to A Diffraction Grating with optically transmissive material with grooves, classified in class 359, subclass 570.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a diffraction grating without the particulars of the grooves as recited in invention II. Further, invention II has separate utility such as in a diffraction grating with the polarization characteristics as recited in invention I. See MPEP § 806.05(d).

Art Unit: 2872

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

***Election Requirement***

8. This application contains claims directed to the following patentably distinct species of the claimed invention:

***In the event that the applicant elects Invention II above, a further election of one of the following species is required.***

Species 1 : Blazed grating : Claims 35-39, 46-64, 101-105, 112-131

Art Unit: 2872

Species 2: Sinusoidal grating : Claims 40-45, 106-131

9. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is , finally held to be allowable. Currently, With respect to the species of Invention II no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Any inquiry concerning this communication should be directed to Supervisory Examiner Cassandra C Spyrou at telephone number 703-308-1687.
